Nikola Tesla: The Dynamic Theory of Gravity of Nikola Tesla explains the relation between gravitation and electromagnetic force as a unified field theory (a model over matter, the aether, and energy). It is a unified field theory to unify all the fundamental forces (such as the force between all masses) and particle responses into a single theoretical framework.

Nikola Tesla: UFO and Dynamic Theory of Gravity | Genius

Tesla's Dynamic Theory of Gravity and MHD method of Spacial Electropulsion brought a cosmic crowning achievement to the works of Faraday, Wm. Thomson, J. J. Thomson, and Edmund Hall. CONCLUSION. The ether is a universal medium, which fills all space. It appears to be "dynamic" relative to an earth moving thousands of miles per hour through space.
