WoRMS - World Register of Marine Species

Marine mammals play a vital role in the balance of marine ecosystems. Strong ecosystems rely on maintaining a healthy and diverse assemblage of plants and animals. Marine mammals keep populations in check and create habitats for other underwater inhabitants. Given their importance in the ecosystem, all species of marine mammals are protected under the United States Marine Mammal Protection Act (MMPA).

Marine mammals can be difficult to identify at sea. Even under ideal conditions, an observer often gets little more than a brief view of a splash, blow, dorsal fin, head, flipper, or back, and this is often at a great distance. Rough weather, glare, fog, or other bad sighting conditions compound the problem.
