preamble, I would argue that this statement is false - it definitely does not skip the pedagogy.

Python 3 Text Processing with NLTK 3 Cookbook: Jacob ...

The book is intended for those familiar with Python who want to use it in order to process natural language. Following this In its introduction, the Python 3 Text Processing with NLTK 3 Cookbook claims to skip the preamble and ignore pedagogy, letting you jump straight into text processing.

Python 3 Text Processing with NLTK 3 Cookbook by Jacob Perkins

Then, you'll move onto text classification with a focus on sentiment analysis. And because NLP can be computationally expensive on large bodies of text, you'll try a few methods for distributed text processing. Finally, you'll be introduced to a number of other small but complementary Python libraries for text analysis, cleaning, and parsing.

Python 3 Text Processing with NLTK 3 Cookbook

The key difference is that the default text processing behaviour in Python 3 aims to detect text encoding problems as early as possible - either when reading improperly encoded text (indicated by UnicodeDecodeError) or when being asked to write out a text sequence that cannot be correctly represented in the target encoding (indicated by UnicodeEncodeError).

Processing Text Files in Python 3 — Nick Coghlan's Python ...

This version of NLTK is built for Python 3.0 or higher, but it is backwards compatible with Python 2.6 and higher. In this book, we will be using Python 3.3.2. If you've used earlier versions of NLTK (such as version 2.0), note that some of the APIs have changed in Version 3 and are not backwards compatible.
